

# Smart Switch

## CURRY Series of Smart Products

You can control the electrical appliances on the socket on the APP after the Step 4.2 configuration is successful.

As long as your mobile phone has a network (including 2G/3G/4G/5G/WiFi), you can use your mobile phone to remotely control home appliances anytime, anywhere.

### (2) Voice control via Google Home/Echo Alexa/Siri

#### 1) Alexa

Before voice control, you need to determine the device name first. You can also click " " in the upper right corner of the Smart Life APP device control interface to rename the device. The voice commands supported by Alexa are as follows:

"Alexa, turn on/off <device/scene name>."

#### 2) Google Assistant

The voice commands supported by Google Assistant are as follows:  
"Google, turn on/off <device/scene name>."

#### 3) Siri/mobile phone add shortcut command widget

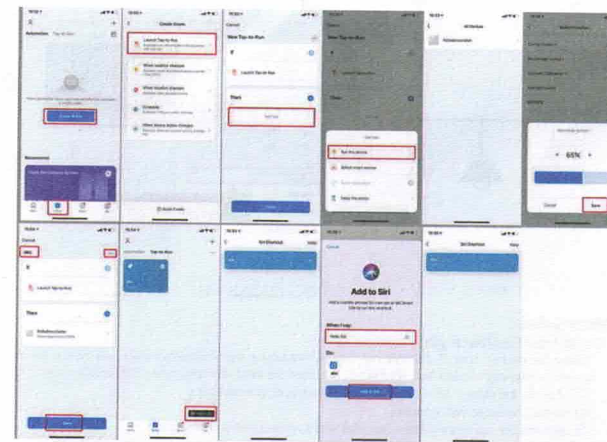

① Siri can trigger the "Tap-to-Run" intelligent scene, first of all, you need to create an "Tap-to-Run" automated command.

- Click "Scene" in SmartLife APP, then click "Create Scene", or "+" in the upper right corner;
- Select "Launch Tap-to-Run";
- Click "Add Task" under Execute, such as "Run the device";
- Select the device to be controlled;
- Select the specific function that needs to be triggered, such as "Switch" - "ON" - "Save" - "Next!" - at this time, click "..." in the upper right corner to name this operation, for example: "abc". "OK" - Click "Save".
- Click "Add to Siri" in the lower right corner and select the "abc" command just created;
- Set the trigger voice of Siri, for example, When I say: "Hello Siri"; Do: "abc" command, and finally click "Add to Siri".

At this point, you can say "Hello Siri" to the Siri of the ISO device (phone/tablet/watch), and the device will automatically execute the command to turn on the lights.

② Add shortcut widget to mobile phone

## 1. Introduction

Thank you for choosing us. The CURRY-Series brand has been committed to creating the most user-friendly smart home products, hoping to bring more better product's experience to customers.

This product complies with Amazon's return policy. If you want to extend the replacement time to 90 days, please follow step 6.2.

Important steps in this manual (installation & how to use & function introduction) are accompanied by operation videos. You can install and use it under the guidance of the video.

Instruction manual video: [bit.ly/w02video](https://bit.ly/w02video)

## 2. Specification

- \*Product name: WIFI Smart Switch
- \*Model: W021/W022
- \*Working voltage: 100-240V 50/60Hz
- \*Maximum peak current: 16A
- \*Maximum peak power: 3800W
- \*Wireless protocol: 2.4 GHz 802.11 b/g/n
- \*Switch standard: EU
- \*Material: V0 PC flame retardant
- \*APP: Smart Life/Graffiti/CURRYSMARTER

## 3. Installation Environment

(1) There must be a neutral wire to use.

(2) Wireless router environment.

① Your smartphone or tablet should be connected to the router's 2.4G frequency and have internet access. (The device only supports 2.4G network, do not use the router's 5GHz or the

Through the video, you can watch more detailed operation steps.

### (3) Timer function

The operation method is shown in the figure:

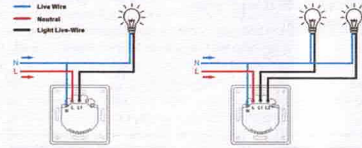

mixed mode of 2.4GHz and 5GHz when configuring the network.)  
 ② Make sure your IOS or Android device and switch are within the coverage of the same router network.  
 ③ Enter the correct WiFi password. It is recommended that the WiFi name and password do not contain special characters, and the length should not exceed 15 characters, otherwise it may cause network configuration failure.

#### 4. Start the Installation

\*Please install professional electricians to avoid short circuit damage to the equipment!

##### (1) Wiring installation

- 1) Disconnect the power
- 2) Remove the old switch and mark the cable
- 3) Wire the shutter switch according to the circuit diagram
- 4) Fix the switches in sequence
- 5) Turn on the power

##### (2) Mobile phone installation application

① Scan the QR code below with your mobile phone, or search for "Smart Life" in the Apple Store or Google Play to download and install.

3

##### (4) Group control

- ① Enter the control interface of the switch, click " " in the upper right corner;
- ② Click "Create Group" and select the device that needs to create a group;
- ③ Click "Save" - name the group and "Save" again;
- ④ Complete, you can see the newly added group on the main interface of all devices.

##### (5) Backlight Control

- ① Factory default mode: When the light is on, the backlight is off; when the light is off, the backlight is slightly on.
- ② It can also be set in the mobile APP:
  - a. Indication switch: The status of the indicator light communicates the on/off of the light.
  - b. Indication position (default mode): Lights up when the light is off, and indicates the position of the switch at night.
  - c. Turn off the backlight

##### (6) Multi-way control (software implementation)

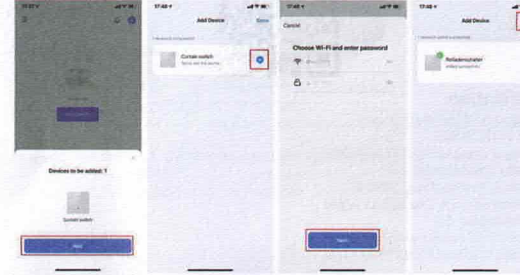

Here is the way to show you how to realize 2 switches to control one light at the same time.

- ① One of the switches is connected to the circuit of the bulb, and the other switch only needs to be connected to the neutral wire.
- ② In the device operation interface, click " " in the upper right corner and find "Multi-Control Association".
- ③ Select the device you want to associate and click "Save".

② Enter your account name and password to log in. If you do not have an account, please register an account first. You can use your mobile number or email address with your account name.

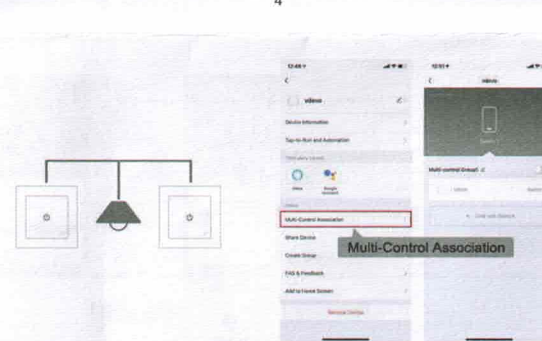

##### (3) Connect the smart switch to the home WiFi through the APP

- ① Connect the phone to the local wifi (2.4G).
- ② Make sure the blue light of the button indicator flashes quickly, the factory default is the fast flashing mode. (Manually enter the network distribution mode: long press the "switch button" button for 10 seconds, until the blue indicator flashes quickly)
- ③ Turn on the Bluetooth of your mobile phone, and the device information will pop up automatically. If you don't see it, just refresh the app, or click the "+" button in the upper right corner of the home page, the Bluetooth searched devices will appear, then click Add.
- ④ Select wifi and enter the correct password. After confirmation, wait for the configuration to be successful.

##### (4) Connect your switch to Alexa

- ① Select "Me" in Smart Life APP;
- ② Select "Alexa" in "Third-Party Voice Services";
- ③ Click "Sign In With Amazon";
- ④ After logging in to the Alexa APP, it will automatically jump to the binding interface, then

#### 6. After Sales

##### (1) How to give feedback

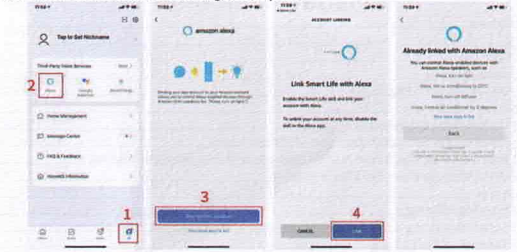

If you still have problems using the product after following the instructions and videos, please prepare the following materials

- ① Videos where the product cannot be used
  - ② Amazon's order number
  - ③ Point out the problem that cannot be used
- Just send questions to [support@currysmaarter.de](mailto:support@currysmaarter.de)  
 Technical Support: [support@currysmaarter.de](mailto:support@currysmaarter.de)

##### (2) How to extend the warranty period

Amazon generally only offers a 7-30 day warranty. We have prepared an extended product warranty plan and a small gift for you, enter the link [bit.ly/curry-vip-club](https://bit.ly/curry-vip-club) or scan the QR code to receive the gift and extend the 60-day warranty and lifetime technical support.

click "LINK" and wait for the binding to complete.

#### 7. FAQ

- (1) What should I do if the WiFi connection of the switch is disconnected?
  - ① Check and confirm that the WiFi signal range is 0 to -60 (the closer to 0, the stronger the signal value).
  - ② Check if your wireless router is overloaded.
- (2) How to check the device virtual ID and Wifi signal strength?
  - Click " " - "Device Information" in the upper right corner of the interface to see the virtual ID and signal strength.
- (3) What should I do if the buttons on the control panel do not respond?
  - ① Remove the upper board with the wash dish, then plug it back in again, and restart the wifi module.
  - ② If it still doesn't work, please turn off the power and turn it on again.

#### 8. Download other language manuals

- ① Scan the QR code to download the French/Italian/Spanish brochure
